

Fabric Cradle Transport Pallets

SPORCIM

- Used in textile and textile manufacturing companies in the stocking and shipping of cloth batch.
- It is made of steel construction. The entire steel construction system is covered with hot dip galvanized methods to increase resistance to corrosion.
- It can be produced in the desired dimensions.
- Products can be stacked.
- It's a stock product that the raw fabric warehouses and textile companies prefer to stock cloth batch.

Metal pallets are an integral part of any distribution centers and a warehouses. Designed as flat structures, these pallets help stack materials, goods, and equipment.

These integral material handling systems ensure efficient storing/shipping of products with minimal damage. The pallets are engineered to ensure the safety of people handling them.

Equipped with a flat support structure, these pallets won't collapse or roll while being lifted by a forklift, pallet jack, or other jacking devices.

Unlike wooden pallets, metal pallets have a long life span & offer a wide range of benefits over traditional wooden pallets. They are designed to replace traditional wooden pallets.
